### 2.4.5 Segment results

## Segment information

The Group has identified its operating segments based on the internal reports that are reviewed and used by the executive management team (chief operating decision makers) in assessing performance and determining the allocation of resources.

The operating segments are identified according to the nature of products and services provided and the key delivery channels, with each segment representing a strategic business unit that offers a different delivery method and/or different products and services. Discrete financial information about each of these operating businesses is reported to the executive management team on a monthly basis.

The segments presented reflect changes to the structure which were implemented during the year. The comparatives have been restated to reflect the changed structure.

Segment assets and liabilities reflect the value of loans and deposits directly managed by the operating segment. All other assets of the group are managed centrally.

## Types of products and services

## Retail banking
