### 2.3.3 Interest margin

Asset pricing - Pricing pressure continued on all mortgage and business lending portfolios. This was partially offset following repricing of mortgage loans during the first half.

Equity contribution - The contribution to margin from net free liabilities and equity reduced, reflecting the lower margin earned by assets funded by these balances.

Liability pricing - the competitive funding environment continues to put pressure on deposit margin following the reductions in cash rate. Liability mix - the continued strong at-call deposit growth has had a positive impact on the total cost of deposit funding

### 2.3.6 Segment results

Segment reporting
An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses. These operating results are regularly reviewed by the Managing Director, to make decisions about the resourcing for each segment, and to assess its performance.

The operating segments are identified according to the nature of the products and services they provide. All reporting segments represent an individual strategic business unit. Each unit offers a different method of delivery, and/or different products and services.

Segment assets and liabilities reflect the value of loans and deposits directly managed by each operating segment. All other assets and liabilities of the Group are managed centrally.

Segment reporting is consistent with the internal reporting provided to the Managing Director, and the executive management team.

Changes to the internal organisational structure of the Group, can cause the Group's operating segment results to change. Where this occurs, the corresponding segment information for the previous financial year is restated.

Types of products and services
Local connection
Contains all local distribution channels, including branch and community banking, business banking, Delphi Bank, financial markets and network support.

## Partner connection

Contains all partner distribution channels, including mortgage brokers, mortgage managers, mortgage originators, Alliance Partners, Homesafe, Leveraged, portfolio funding, financial planning, wealth management, responsible entity activities, other trustee services and custodial services. The partner connection segment is a combination of the third party and wealth cash generating units.

## Agribusiness

Includes the provision of banking services to agribusinesses in rural and regional Australia. Rural Bank and Rural Finance are included within the agribusiness segment.

## Central functions

Functions not relating directly to a reportable operating segment.

## Accounting policies and inter-segment transactions

Measurement of segmental assets, liabilities, income and expenses is in accordance with the Group's accounting policies.
Segment results are determined by including all revenue and expenses associated with each business. Transactions between business segments are conducted at arm's length, and are eliminated on consolidation.

Segment net interest income is recognised based on an internally set transfer pricing policy, based on pre-determined market rates of return on the assets and liabilities of the segment.

## Major customers

Revenues from no individual customer amount to greater than 10\% of the Group's revenue.

Geographic Information
The allocation of revenue and assets is based on the geographic location of the customer. The Group operates in all Australian states and territories, providing banking and other financial services.

### 2.3.12.2 Capital adequacy

The Australian Prudential Regulation Authority (APRA) guidelines require capital to be allocated against credit, operational and market risk.
Banks must maintain a ratio of qualifying capital (comprising Common Equity Tier 1, Additional Tier 1 and Tier 2 capital), to risk weighted assets. The Bank adopted the "standard model" approach prescribed by APRA to calculate the Bank's capital position.

|  | Jun-16 |
| :--- | ---: |
