Notes

 $^{^{7}}$ Includes holdings of self-securitised assets, \$13,480.3 million (March 2022 \$14,445.3 million).

Table 20 Liquidity Coverage Ratio

From 1 January 2015, following the introduction of APS 210, APRA requires ADIs to maintain a minimum 100% Liquidity Coverage Ratio (LCR). The LCR requires banks to hold sufficient High Quality Liquid Assets (HQLA) to meet net cash outflows over a 30-day period, under a regulator-defined stress scenario. The Group's LCR for the quarters ending 30 June 2022, 31 March 2022 and 31 December 2021 are presented in the following table (Table 20), using the Basel standard disclosure template and is based on a simple average of LCR outcomes observed during each period (i.e. 90 data points for the quarter ended 30 June 2022, 90 data points for the quarter ended 31 March 2022 and 91 data points for the quarter ended 31 December 2021).

The Group manages its daily LCR requirement in line with the regulatory minimum, with appropriate additional Board and management buffers that are set in line with the Group's risk appetite. Movements in the LCR are attributed to changes in net cash outflows and holdings of liquid assets. Table 20 details the quantum of movements impacting the LCR between periods. These differences between periods are in line with the Group's normal course of business. Average liquid assets for the March 2022 quarter were \$14,539.0 million, of which HQLA was \$12,526.3 million. HQLA comprises cash, deposits with the Reserve Bank of Australia (RBA), Australian Semi-Government and Commonwealth Government Securities.

Cash inflows and outflows are as prescribed in APS 210 and are calculated by applying APRA-prescribed run-off factors to maturing debt and deposits and discount factors to inflows/assets.

The Group has a well-diversified deposit and funding base without undue concentration. The Group does not have significant derivative or currency exposures that would impact upon cash flows.

Notes

⁸ As per BEN's ASX release dated 21 October 2020, APRA has advised the Bank that an overlay of 10 per cent will be added to net cash outflows from 2 November 2020. This is to remain in place until all required reviews are completed and all findings relating to the Bank's identification of a historic error in its calculation of the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) are addressed to APRA's satisfaction. These reviews are now complete and BEN is in the process of actioning the findings. The average net cash outflow overlay from 1 October 2021 to 31 December 2021 was \$911.8 million, from 1 January 2022 to 31 March 2022 was \$947.9 million, and from 1 April 2022 to 30 June 2022 was \$984.9 million. These amounts are reported at item 24 Total net cash outflows.

Table 21 Net Stable Funding Ratio

The Net Stable Funding Ratio (NSFR) came into effect from 1 January 2018 and ensures a bank's assets and off-balance sheet exposures are financed with a stable source of funding. The ratio of the Group's total Available Stable Funding (ASF) to total Required Stable Funding (RSF) must exceed the APRA minimum requirement of 100%. The Group's NSFR as at 30 June 2022 was 129.2%.

As at 30 June 2022 the Group's main sources of ASF was deposits from retail and small business customers (71.5%), wholesale funding (17.2%) and capital (11.0%). RSF mostly consisted of residential mortgages (64.2%) and loans to retail, small business, non-financial corporate and public sector entity customers (18.6%).
