Table 21 Net Stable Funding Ratio

BEN's spot NSFR decreased from 126.2% in March 2023 to 121.5% in June 2023, predominately driven by lower funding benefit provided by Term Funding Facility loans as they approach and reach maturity.

The Group's main sources of ASF were deposits from retail and small business customers (72%), wholesale deposits and funding (17%), and capital (11%). The major components of RSF on the Group's balance sheet were residential mortgages (69%), and non-residential mortgage lending (20%).
