### Table 20 Liquidity Coverage Ratio

BEN's average LCR for the December 2023 quarter was 151% (September 2023: 149%). The average LCR is calculated based on the 62 daily observations during the reporting period (66 observations for September 2023 quarter).

The quarterly average LCR increased by 2% driven by a reduction in average net cash outflows, offset by a decrease in average liquid assets.

The decrease in average net cash outflows was largely due to reductions in wholesale deposit and unsecured wholesale funding cash outflows as well as the removal of the net cash outflow overlay.

This amount is included at item 24 total net cash outflows.
